Javascript – Beginner

Powershell and Bash – Beginner

Node.js - Beginner

React (and React Native) – Beginner

Angular – Beginner

Microsoft Azure – Beginner

AWS – some knowledge

GIT (hub and CLI) - Beginner

German - Basic

Personal Statement

From playing games as child on my ZX spectrum 16k to running my own Accounting business computers have always played a large part in my life. For a combination of personal reasons my initial educational (and subsequent career) path took me down the route of Social Sciences and Justice where I largely worked as a Probation Officer since 2004. However, having grown out of those aspects of modern-day life I have decided to develop in other areas and gained full membership of the Association of Accounting Technicians in 2020. The accounting work once again exposed to me to the usefulness of computers and of computing, given most accounting software is based on cloud and API connectivity. Hence for the past year I have been undertaking two online bootcamp courses in the fields of web development (MERN and MEAN stacks) and Microsoft Azure software development.

These courses have given me valuable knowledge and insights into HTML, CSS and Javascript whilst covering frameworks such as REACT, BOOTSTRAP and JQUERY. With the assistance of a mentor, I have been able to produce the following portfolio (which is in the development stage) to demonstrate the projects which I have been working on. Whist I am close to completing the web development course I am keen to continue on this path and am actively seeking Junior and Trainee roles, hence my interest in an opportunity with your company.

Education

Qualification	Provider	Year
Intro to Front End Development	Career Foundry	2021
